

Geography is Destiny...

If you are born in a developed country your chances of dying in child birth, of a hernia, or due to untreated trauma are very low. But if you were born in one of 85 poor countries, it is very likely that you will die of a traumatic injury without adequate treatment, or in childbirth, or of any one of many simple surgical diseases which are easily treated with safe surgery and anesthesia.

**Hundreds of thousands have no access to safe surgery and anesthesia!**

## Help us improve:

- Facilities
- Pulse Oximeters
- C-Sections
- Emergency Surgery
- Training and Education

## Help GSC save lives today...
